Viva EcoSal System

Good prospects for industrial washers

EU Ecolabel: FR-2/039/97612

**EU Ecolabel certified products
for every continuous batch washer**

The Viva EcoSal System

FROM LOW AS 40°C

The components of the **Viva EcoSal system** are EU Ecolabel-certified products:

- **Viva EcoSal** – detergent
- **Viva EcoOx** – bleach
- **Viva EcoForte** – alkali booster
- **Viva EcoBlue** – grease remover and netler

Specially designed for continuous batch washer

Our products have been specially developed to meet the high demands of modern continuous batch washer.

Your advantages at a glance

- **Energy-saving:**
reliable cleaning from as low as 40 °C
- **Efficient:**
powerful cleaning performance for best results
- **Responsible:**
awarded the EU Ecolabel
- **Economical:**
perfectly balanced formula for economical use

Flexible use

Despite their specialisation, our products are also suitable for use in conventional spin washers.

Make professional wash

ENSURES CLEANLINESS

Viva EcoSal

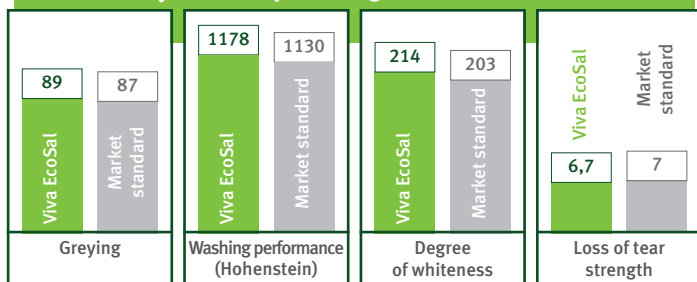

is an ecological sole detergent that should be used in neutral to alkaline washing processes. The optimum temperature range is between 40 °C and 60 °C. Due to its low foaming tendency and excellent rinsability, it is particularly well suited for washing processes with high water reuse.

Viva EcoSal achieves excellent basic white values and degrees of whiteness with a neutral colour tone.

Viva EcoForte achieves rapid fibre swelling. Its high alkalinity actively supports fat saponification. The product has a high dispersing capacity for pigment dirt and an excellent complexing capacity for heavy metals such as iron, manganese and copper.

Viva EcoSal system: Comparison figures with the market standard

Thorough, hygienic, effective and

ing in the continuous bat

Viva EcoSal

effective detergent that is gentle on people and textiles

THE IDEAL SYSTEM

Viva EcoOx
bleaching agent based on concentrated peracetic acid

FOR LAUNDRY ...

Viva EcoForte

highly alkaline basic detergent and alkali booster

FROM THE CATERING ...

Viva EcoBlue
highly effective grease remover and netler

AND HOTEL INDUSTRY!

excellent – because the Viva EcoSa

ch washer even better!

HYGIENIC LAUNDRY

Viva EcoOx acts as a bleach even at low temperatures and is gentle on colours and fibres. The combination of peracetic acid and hydrogen peroxide in high concentrations enables inexpensive and powerful bleaching processes.

AS **Viva EcoOx** breaks down into its organic substances acetic acid and water during the washing process, it is better for the environment. This means that aquatic ecosystems are not polluted.

REMOVES OILS & GREASES

Viva EcoBlue is used as a grease remover and net in neutral to alkaline washing processes. Due to its low foaming tendency and good rinsability, the product is particularly well suited for washing processes with high water reuse.

Viva EcoBlue is designed for treating workwear, mats, cleaning cloths and other heavily oil-contaminated textiles. The optimum temperature range is between 40 °C and 60 °C.

l System is EU Ecolabel certified!
